

## PREMIUM PIGEON PROOFING FOR SOLAR PANELS

## Background

Pigeon proofing has increasingly become a necessity in recent years, with more and more pigeons choosing to nest under solar panels. They create unwanted noise, make a mess and damage cables.

Unfortunately, most pigeon-proofing systems don't add much to the visual appeal of solar panels! That's why we designed SolaSkirt... a pigeon-proofing system that gives solar panels a professional, finished appearance, blending perfectly with the solar panels it surrounds.

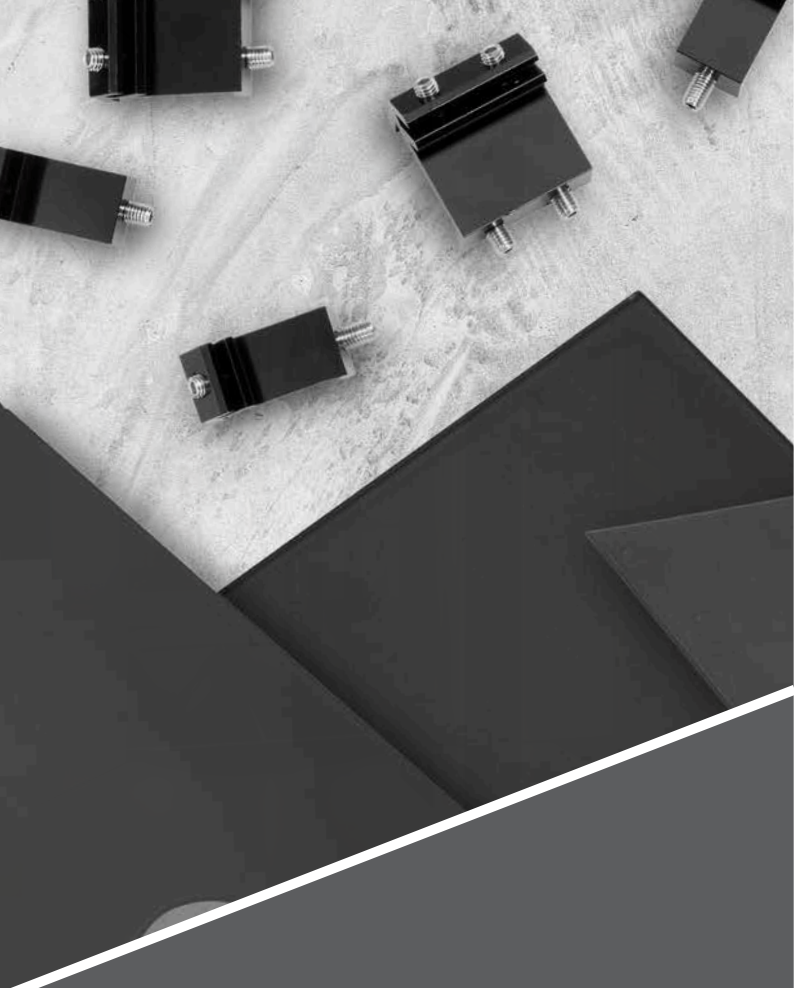

## Function

SolaSkirt is a durable, UV and weather resistant system, made from exterior grade, black powder-coated aluminium.

Combining aesthetics and functionality seamlessly, SolaSkirt hides unsightly gaps, rail and cables beneath solar arrays, all the while keeping those pesky pigeons at bay.

Importantly, SolaSkirt is also easy to install - and can be fitted with all types of tiles and solar panels.

## Production

SolaSkirt is made from aluminium sheet which is cut to shape in Bristol, then powder-coated in Cardiff.

The matte black powder-coating is heated to 200 degrees Celsius, forming a gel layer and the skirt is then force-cooled, resulting in a durable, long-lasting finish.

Our smart clamps are also made from black powder-coated aluminium, to blend perfectly with the solar panels and skirt they're fitted to.

## Our network

SolaSkirt was introduced in 2019 and it's now distributed to solar PV installers and pest controllers all over the UK. Currently, over 400 solar installers are using SolaSkirt, including companies like Spirit Energy, Sungift, JoJu, Energize, and Atlantic Renewables... and they're reporting more referrals and better customer reviews.

Join our growing installer network and elevate your solar installations, with premium pigeon-proofing from SolaSkirt.

*Atlantic Renewables use SolaSkirt on a number of our installations. It provides the best looking finish to the solar panels - and keeps birds away from the underneath of the panels. It is user friendly when it comes to the installation of the product. My installers prefer installing this system.*

Daryl Richardson  
**Operations Manager - Atlantic Renewables**

*A high quality and visually appealing product... Best of all, the pigeons have pushed off!*

Paul Sims  
**SolaSkirt customer**

*We have been working with the team at SolaSkirt for the last 3 years and have installed over 50 systems. SolaSkirt is a much better looking product, that doesn't fall apart like other bird protection. It has definitely added value to our business.*

Russell Burtenshaw  
**Managing Director - Energize (UK) Ltd.**

*Had my SolaSkirt fitted yesterday and absolutely over the moon with it. It looks first class.*

Mike Roylance  
**SolaSkirt customer**
